

QUALITY POLICY

Coidan Graphite Products Ltd High Temperature Division specialises in the sale, design, consultancy, manufacture, contract management and supply of consumable equipment for many industries including Iron & Steel, Refractory, Non Ferrous metals, Aerospace, Glass, Semi Conductor, Electronics and Nuclear; essentially in high temperature applications. The High Temperature Division also represents, as an agent, Seco Warwick for their range of vacuum furnaces and Ibiden Graphite for their range of high quality isostatic graphite grades.

Additionally, **Coidan Graphite Products Ltd Process Equipment Division** acts as an agent for Titan Metal Fabricators Inc and Wilk Graphite in the sale, design, consultancy, manufacture, contract management and supply of corrosion resistant equipment for process industries including oil, petrochemical, pharmaceutical and food and the offshore and marine industries.

The nature of the work places particular emphasis on experience, capability, reliability and quality.

The prime objectives of the Coidan Graphite Products Ltd management team are to provide products, equipment and services in a manner which meets contractual and regulatory requirements, the expectations of our customers and to continually improve this equipment and service through customer feedback and regular audits of the Quality and Business Management Systems.

To achieve these objectives, it is a Coidan Graphite Products Ltd policy to implement and maintain a Quality Assurance System based on the requirements of BS EN ISO 9001:2008.

This policy shall be issued to, and understood by, all Coidan Graphite Products Ltd personnel.

This policy, the Quality Manual and the Business Management System shall undergo regular review to ensure its continuing relevance and effectiveness.

David Coidan, Managing Director

Coidan Graphite Products Ltd
